

LETTER OF REFERENCE: Andrew Thomas

Dr. Arash Asadi
Faculty of Electrical Engineering, Mathematics and Computer Science
Delft University of Technology
Mekelweg 4,
2628 CD Delft,
Netherlands

29 November 2024

Dear Dr. A. Asadi:

It is my pleasure to recommend Andrew Thomas for admission to the PhD program in your department. I have known Andrew for one year, during which time he worked as a semiconductor packaging intern in the packaging department at Compound Semiconductor Applications Catapult, United Kingdom.

Andrew had been working with me on several power electronics and RF packaging projects. The work that was performed during these projects was experimental in nature and required him to become familiar with the packaging materials, processes and various semiconductor equipment.

The results of his work on thermal and electrical characterization of GaN MMIC on different metal-diamond matrix composites could directly be used in an industrial sponsored project. His work on process characterization of sintering die attach technologies supported an industrial sponsored power electronics project and could also be used directly in the project. This attests to the quality of his work.

Andrew was an inquisitive quick learner and excellent collaborator who worked well with multidisciplinary team but also independently with minimal supervision. He also demonstrated critical thinking and ability to articulate information and ideas during process troubleshooting and team meetings respectively.

I wholeheartedly recommend Andrew and will gladly serve as a reference for his character and work ethic.

Sincerely,

A handwritten signature in black ink, appearing to be 'Yong Ling Yap', with a stylized, flowing script.

Yong Ling Yap

Senior Package Development Engineer
